

Volunteer Placement

Why volunteer with us?

With busy lives, it can be hard to find time to volunteer. However, the benefits of volunteering can be enormous. Volunteering offers vital help to people in need, worthwhile causes, and the community, but the benefits can be even greater for you, the volunteer. We can help you to find friends, connect with the community, learn new skills, and even advance your career.

Giving to others can also help protect your mental and physical health. It can reduce stress, combat depression, keep you mentally stimulated, and provide a sense of purpose. While it's true that the more you volunteer, the more benefits you'll experience, volunteering doesn't have to involve a long-term commitment or take a huge amount of time out of your busy day. Giving in even simple ways can help those in need and improve your health and happiness.

Benefits of volunteering: 4 ways to feel healthier and happier

1. Volunteering connects you to others
2. Volunteering is good for your mind and body
3. Volunteering can advance your career
4. Volunteering brings fun and fulfillment to your life

1: Volunteering connects you to others

One of the more well-known benefits of volunteering is the impact on the community. Volunteering allows you to connect to your community and make it a better place. Even helping out with the smallest tasks can make a real difference to the lives of people, animals, and organizations in need. And volunteering is a two-way street: It can benefit you and your family as much as the cause you choose to help. Dedicating your time as a volunteer helps you make new friends, expand your network, and boost your social skills.

Make new friends and contacts

One of the best ways to make new friends and strengthen existing relationships is to commit to a shared activity together. Volunteering is a great way to meet new people, especially if you are new to an area. It strengthens your ties to the community and broadens your support network, exposing you to people with common interests, neighborhood resources, and fun and fulfilling activities.

Increase your social and relationship skills

While some people are naturally outgoing, others are shy and have a hard time meeting new people. Volunteering gives you the opportunity to practice and develop your social skills, since you are meeting regularly with a group of people with common interests. Once you have momentum, it's easier to branch out and make more friends and contacts.

2: Volunteering is good for your mind and body

Volunteering provides many benefits to both mental and physical health.

Volunteering helps counteract the effects of stress, anger, and anxiety. The social contact aspect of helping and working with others can have a profound effect on your

overall psychological well-being. Nothing relieves stress better than a meaningful connection to another person.

Volunteering combats depression. Volunteering keeps you in regular contact with others and helps you develop a solid support system, which in turn protects you against depression.

Volunteering makes you happy. By measuring hormones and brain activity, researchers have discovered that being helpful to others delivers immense pleasure. Human beings are hard-wired to give to others. The more we give, the happier we feel.

Volunteering increases self-confidence. You are doing good for others and the community, which provides a natural sense of accomplishment. Your role as a volunteer can also give you a sense of pride and identity. And the better you feel about yourself, the more likely you are to have a positive view of your life and future goals.

Volunteering provides a sense of purpose. Older adults, especially those who have retired or lost a spouse, can find new meaning and direction in their lives by helping others. Whatever your age or life situation, volunteering can help take your mind off your own worries, keep you mentally stimulated, and add more zest to your life.

Volunteering helps you stay physically healthy. Studies have found that those who volunteer have a lower mortality rate than those who do not. Older volunteers tend to walk more, find it easier to cope with everyday tasks, are less likely to develop high blood pressure, and have better thinking skills. Volunteering can also lessen symptoms of chronic pain and reduce the risk of heart disease.

3: Volunteering can advance your career

If you're considering a new career, volunteering can help you get experience in your area of interest and meet people in the field. Even if you're not planning on changing careers, volunteering gives you the opportunity to practice important skills used in the workplace, such as teamwork, communication, problem solving, project planning, task management, and organization. You might feel more comfortable stretching your wings at work once you've honed these skills in a volunteer position first.

Teaching you valuable job skills

Just because volunteer work is unpaid does not mean the skills you learn are basic. Many volunteering opportunities provide extensive training. For example, you could become an experienced crisis counselor while volunteering for a women's group or a knowledgeable art historian while donating your time as a museum docent.

Volunteering can also help you build upon skills you already have and use them to benefit the greater community. For instance, if you hold a successful sales position, you can raise awareness for your favorite cause as a volunteer advocate, while further developing and improving your public speaking, communication, and marketing skills.

Gaining career experience

Volunteering offers you the chance to try out new career without making a long-term commitment. It is also a great way to gain experience in a new field. In some fields, you can volunteer directly at an organization that does the kind of work you're interested in. For example, if you're interested in nursing, you could volunteer at a hospital or a nursing home.

Your volunteer work might also expose you to professional organizations or internships that could benefit your career.

When it comes to volunteering, passion and positivity are the only requirements

While learning new skills can be beneficial to many, it's not a requirement for a fulfilling volunteer experience. Bear in mind that the most valuable assets you can bring to any volunteer effort are compassion, an open mind, a willingness to pitch in wherever needed, and a positive attitude.

4: Volunteering brings fun and fulfillment to your life

Volunteering is a fun and easy way to explore your interests and passions. Doing volunteer work you find meaningful and interesting, can be a relaxing, energizing escape from your day-to-day routine of work, school, or family commitments. Volunteering also provides you with renewed creativity, motivation, and vision that can carry over into your personal and professional life.

Tips for getting started

First, ask yourself if there is something specific you want to do.

For example, do I want....

- ...to meet people who are different than me
- ...to try something new
- ...to do something with my spare time
- ...to see a different way of life and new places
- ...to have a go at the type of work I might want as a full-time job
- ...to do more with my interests and hobbies
- ...to share something I'm good at

The best way to volunteer with us is to find a match with your personality and interests.

Getting the most out of volunteering

You're donating your valuable time, so it's important that you enjoy and benefit from your volunteering.

Don't be afraid to make a change. Don't force yourself into a bad fit or feel compelled to stick with a volunteer role you dislike. Talk to us about changing your focus.

Enjoy yourself. The best volunteer experiences benefit both the volunteer and us. If you're not enjoying yourself, ask yourself why. Is it the tasks you're performing? The people you're working with? Or are you uncomfortable simply because the situation is new and unfamiliar? Pinpointing what's bothering you can help you decide how to proceed.
